Pabaka Arjyama Senapati

QA Automation Engineer | Java · Selenium · TestNG

+91 9337455845 | Bhubaneswar | pabakaarjyamasenapati@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

QA Automation Engineer at Quick Heal Technologies automating Seqrite enterprise security products on web and Windows desktop using Java, Selenium/Selenide, TestNG and the Page Object Model.

Skills

- **Test Automation:** Selenium WebDriver, Selenide, TestNG, Page Object Model (POM) framework, Allure, LDTP, XPath/CSS
- **Manual QA:** Test case design, Functional, Smoke, Sanity, Regression, E2E, Localization
- **QA Methods:** Pairwise testing, Defect Tracking, SDLC, STLC, Defect Life Cycle
- **Languages:** Java (OOP, Collections), Python, SQL
- **Tools:** Git, GitHub, Gradle, Eclipse, VS Code, Postman, MySQL, JDBC
- **Soft Skills:** Problem-solving, Collaboration, Adaptability

Professional Experience

Quick Heal Technologies Ltd. Apr 2026 – Present

QA Engineer Intern (Functional & Automation Testing)

Seqrite Endpoint Protection (EPP 8.6) – QA Automation

- Automated the Policy Change Notification E2E flow: 16 scenarios across 8 policy types, 100% pass rate.
- Built a mail.tm inbox page object to replace a Cloudflare-blocked mailbox, restoring 100% automated email checks.
- Designed a pairwise coverage matrix, cutting 48 combinations to 12 cases (75% fewer) without losing coverage.
- Maintained EPP 8.6 regression automation scripts in a POM-based TestNG framework with Allure reports.
- Automated Windows desktop flows (Remote Installer) with 10+ scripts using LDTP (Linux Desktop Testing Project).

Lahan – Release Validation & Automation Support

- Configured QA servers and deployed 20+ releases across validation cycles.
- Ran automated smoke and sanity suites on all 20+ releases and reported pass/fail results.

Sciter (Client Product) & Product Releases – Functional QA

- Performed 58 days of manual functional validation on client product Sciter; re-ran sanity suites per release.
- Raised and tracked 95+ valid defects across projects through the full defect life cycle.
- Validated 20+ screens of a Portuguese-language release through localization checks.

Project

Banking Management System *Java, MySQL, JDBC*

- Developed a Java banking system with accounts, login and transactions on MySQL via JDBC.
- Added exception handling and input validation for consistent transactions.

Education

B.Tech (CSE) – Siksha 'O' Anusandhan University (CGPA: 8.72) 2022 – 2026

Class XII (Science) – Jupiter Higher Secondary School (87.84%) 2021

Class X – Bhagabati Bidyapitha, Biridihi (84.13%) 2019

Certifications & Achievements

- EY GDS Cybersecurity Training Program (2025) – capstone on AI-driven cloud vendor risk assessment
- HackerRank Java & SQL (5-star) | Solving for India Hackathon (GfG & AMD) | Hacktoberfest 2024
